

Collaborative Curriculum African Project to enable young people and children learners to interact across geographical boundaries and feel a part of the **Global Interconnectedness!**

SOS

Welcome to Boosting a Better World Orphanage for HIV AIDs Orphans and the Disabled in the North West Region of Cameroon.

**Help Grace react to a disruptive setback.**

Helping a community help their most vulnerable children

Anyone who has faced the challenge of taking care of HIV AIDS orphans knows how difficult it is to find good home-care providers, as well as legal and financial advice. **Grace Awantu's innovative God is Great Orphanage idea** was to help her own family orphans and the disabled when she found herself increasingly becoming other orphans and their families' resource, information, advice, care and services all in one place (her family home).

Her constantly brainstorming with orphans led her to open a small agency (Better World Girls Empowerment and learning Centre in Bamenda town, North West Region of Cameroon) providing private advice and in-home basic care. She expanded the initiative in 2006, by affiliating it in with Better World Cameroon (grassroots Umbrella NGO), and it became One Place Care and Training Centre in basic skills for livelihoods.

Unfortunately early this year the Bamenda City Council ruthlessly pulled down her Centre in its "operation town modernization" forcing Grace into an unprecedented **set back**. She has managed to accommodate the most desperate of the young orphans in her home but the rest have gone back to the streets.

**Grace is looking for well wishers who can help her in reacting to this set back. She intends to reconstruct a more decent centre which provides financial and legal advice, a recreation and organic garden and training workshop, assisted living dormitories and kitchen, and hospice care dispensary.**

**It is all about protecting the Oneness and interconnectedness of life.**
